Experienced Meat Cutters.

We are looking for experienced Meat Cutters, mainly beef or veal, which govern all aspects of the profession. For different clients

You will be involved with trimming, splitting and distributing the meat. The cuts of meat come from the 'front foot' (including citron, flower arrangement, mouse shoulder, blade muscle) and 'hindquarter' (including silverside, thick flank, topside, thick waist, tailpiece, donkey) of cattle. You work the entire shift to a workplace.

You will receive via the conveyor meat parts, machined by boners. You cut the meat parts, the large pieces of fat and the thick tendons off. The remains of the meat parts you slide through a snippergat vetgat or in a separate container. The incongruous meat parts you throw on the conveyor belt for further processing such as the webs of the meat parts. You make using a "steel" or grinder sure you his knife is sharp.

Do you have proven experience as a Meat Cutter, a good work ethic, and you have no objection to start early? Do you find it no problem to work in a cold room (9 degrees) and heavy physical work for you no problem? Then we are looking for you! Preferably we are looking for candidates with proven experience. However, candidates who

have worked in a slaughterhouse with cutting experience (meat), are also invited to apply!

Suitable candidates go on a temporary basis to work with our customers. The duration of the employment setting is determined by the quality; work well is to work long term. New employees are, if we have accommodation available by us, housed in one of the rental housing, the rent is deducted from your salary. The salary of a Meat Cutter is in accordance with the CAO for the Meat Industry, the height of the hourly rate is determined by the quality.

Experienced boners.

We are looking for experienced boners, mostly beef or veal, which govern all aspects of the profession. For different clients

You're deboning cattle / calves (forefoot or hindfoot) so meat is ready for further processing. You will be responsible for the delivery of meat from cold store to your worktable, the manually cutting of bones and joints, creak, excess fat and other impure meat parts, passing meat through machines, assessing quality meat and produce for further processing, sorting of residues.

You will work alongside the famous boning, with electrical and mechanical machines, you control these machines and fixes minor malfunctions and allows machines and work areas clean. It is important that you carry out the work in accordance with the prescribed rules of hygiene, safety and quality. You can work independently. Do you have proven experience as Deboner, a good work ethic, and you have no objection to start early? Do you find it no problem to work in a cold room (9 degrees) and heavy physical work for you no problem? Then we are looking for you! Preferably we are looking for candidates with proven experience. However, candidates who have worked in a slaughterhouse with cutting experience (meat), are also invited to apply! Suitable candidates go on a temporary basis to work with our customers. The duration of the employment setting is determined by the quality; work well is to work long term. New employees are, if we have accommodation available by us,

housed in one of the rental housing, the rent is deducted from your salary.
Boners are on piece rate, the amount of the hourly rate is determined by the amount that he is processing every day.

ART programmers

Time-based assistance ART programmers
The currently envisaged tasks/scope of work to be done can be broken down as follows:
1) Integrate ART into configuration management procedures by migrating the current Excel test assets into textual format.
2) Describe or migrate some underspecified test language constructs, variable scoping and quoting rules,
3) Harmonise the test cluster design
4) Introduce systematic use of terminology from the specification documents, in particular regarding the HCI interface requirements mappings,
5) Implement the ability to execute tests partially by a) adding respective test engine features and b) by abandoning non-explicit state carry-over from one test step into the next,
6) Implement features for test case debugging,
7) Implement IDE integration features (e.g., syntax coloring),
8) Enhance the engine capabilities to reflect the specific ASN.1 message composition of FDPS, in particular regarding incremental updates to objects.
9) Provide an ability to distribute and balance tests granular over multiple (virtual) machines,
10) Introduce feedback of completion of action from AUT to engine to avoid engine wait states,

11) Integrate code coverage features,
12) Integrate ART report generation into EQM TE3/TE2 CWP test report templates and/or Remedy.

EDUCATIONAL REQUIREMENTS

- University degree or equivalent professional knowledge
 - Good oral and written communication skills in English
- ### TECHNICAL AND PROFESSIONAL QUALIFICATION

Essential requirements:

- Experience with Tcl/TK
 - Experience with (test) programming language design and interpreter implementation.
 - Experience with automated testing of quasi-realtime systems
 - Experience with C++ code coverage analysis tools
- Desirable requirements:
- Experience with Air Traffic Control and Controller Working Positions
 - Experience working towards SIL-2/SWAL-3 software assurance level
 - Experience with requirements management systems such as DOORS

EXPERIENCE / SKILLS REQUIRED

- Ability to identify, analyse and solve problems and to present key issues and possible/recommended solutions in a clear, structured and concise way.
- Well organized and systematic in his/her work
- Cooperates and works well in a team.

Experienced Design Supervisor

Design Supervisor who will take responsibility for system standardization, modularization, R&D and accompanying

product documentation. As a leader of a team, your work will typically be carried out on a project basis, where specific machines are ordered by customers.

Duties and responsibilities

- Assign design resources ensuring design quality and documentation.
- Participate where necessary in cost calculations for machine requests made under responsibility of Sales Support and Project Management.
- Coordinate standardization of current machine designs to enable ease of re-issuing future

quotations and swift repeatability of machines with minimum effort of the Design department.

- Leading standardization and R&D projects.
- Review and approve machine design and changes in cooperation with Project Management.
- Develop, implement and maintain policies, standards, procedures and design tools for the engineering and technical work performed in the Design department.

Perform administrative functions such as reviewing and writing reports, approving expenditures, enforcing rules, and recommendations for investments.

Your skills and interests:

- A substantial track-record (5+ years) in specifying and designing complex automated machines where product-handling is essential, from early quotation and (pre-) concept phase – including making detailed quotation calculations – up to machine qualification / commissioning. Experience in coordinating a multidisciplinary design team is an advantage.
- Knowledge of practical application of engineering science and technology. This includes applying principles, physical laws and their interrelationships, techniques, procedures, and equipment, and to the design and production of machines and services.
- Skilled in development methodologies.
- Strong proven affiliation with mechatronics, and knowledge of relevant equipment, policies, procedures and machine directives related to machine building (CE).
- Experience as project leader to manage standardization and R&D projects.
- Fluency in English, both orally and in writing.
- Good skills in German (reading, orally, preferably also writing) is an advantage.
- Analytical, technically creative, hands-on team-player with good communication skills.
- Technical education at academic level, or excellent bachelor level.

Account-Manager/in (B2B) Online-Reisedeals

Account-Manager/in (B2B) Online-Reisedeals

Vollzeit, Amsterdam

Möchtest Du für den am schnellsten wachsenden Online Reise-Vermittler in Europa arbeiten? Und uns in Deutschland mithilfe deines Verkaufstalents genauso erfolgreich machen, wie es bereits in den Niederlanden ist? Wir bieten Dir dazu einzigartige Karriereöglichkeiten in einem boomenden Start-Up!

Wie alles begann

Die Firma wurde im April 2010 in den Niederlanden gegründet. Nur 4 Jahre später bieten wir die preisgünstigsten Reiseerlebnisse in Europa an. Und unser Wachstum ist noch nicht vorbei... schon bald wird der Rest der Welt folgen!

Die Idee ist einfach: 9 inspirierende Angebote pro Tag, die ultimativen Reiseerlebnisse, die einfach zu buchen sind. Im lebhaften Büro in Amsterdam arbeiten jeden Tag 400 begeisterte, internationale Mitarbeiter zusammen, um die besten Urlaubsziele ausfindig zu machen und die besten Angebote für alle zu gestalten und buchbar zu machen! Wir beginnen jeden Tag mit einem frischen Kaffee und einem Team-Update, um unsere Verkaufsziele für den Tag festzulegen und zu sehen, ob wir alle noch auf dem richtigen Kurs liegen. Im Laufe des Tages bist Du dann auf der Suche nach aktuellen Trends, bewertest die Konkurrenz und identifizierst heiße Leads. Deine Herausforderung ist dabei, Hotels davon zu überzeugen, dass wir der beste Partner für sie sind. Du wirst eigenständig daran arbeiten einen eigenen Kundenstamm aufzubauen. Dabei sind sowohl die Akquise neuer Kunden, als auch die Pflege bereits bestehender Kundenbeziehungen für eine langfristige und wertvolle Zusammenarbeit deine Kernaufgaben. After-Sales und das Ausführen von administrativen Tätigkeiten gehören natürlich ebenfalls zur täglichen Routine dazu.

Um Deine persönlichen Einnahmen zu maximieren, ist dein Ziel die besten Preise und Provisionen auszuhandeln und durch Eigeninitiative und viel Enthusiasmus neue Vertragspartner (Hotels und Reiseveranstalter) zu gewinnen. Neben dem Erreichen Deiner individuellen Ziele wird von Dir ebenfalls erwartet, ein guter Teamplayer zu sein. Zusammen mit Deinen Teammitgliedern

(z.B. Webredakteuren und Kundenbetreuern) trägst Du die Verantwortung, das Wachstum auf dem deutschen Markt weiterhin zu stimulieren und zu erhöhen.

Voraussetzungen

Du bist kreativ, enthusiastisch, flexibel und du hast Spaß an der Arbeit; Du hast einen Bachelor-Abschluss in BWL/VWL/Marketing/Tourismus; Du hast mindestens 1-2 Jahre Erfahrung im Vertrieb/Verkauf/Outbound Calling und in der Kundenbetreuung; Du bist ein Weltenbummler und liebst das Reisen genauso wie wir; Du bist optimistisch und bereit, jeden Tag etwas Neues zu lernen; Exzellente Sprachkenntnisse auf Deutsch in Wort und Schrift und sprichst fließend Englisch; Du bist ein Kommunikationstalent und kannst Menschen begeistern und überzeugen; Du bist vertriebsorientiert und freust Dich über jeden Vertragsabschluss; Du lebst bereits in der Amsterdam oder bist bereit umzuziehen.

Was erwartet Dich bei uns

Jede Menge Herausforderungen und ein einmaliges Abenteuer; Freiheit, Verantwortung und selbständiges Arbeiten; Gesundes Mittagessen und kaltes Bier im Kühlschrank; Ein nagelneues MacBook Air; Ein tolles und inspirierendes Büro an einer der schönsten Grachten in Amsterdam; Kolleginnen und Kollegen aus der ganzen Welt; Auf Wunsch ein eigenes Fahrrad; Trainings und Schulungen um dich konstant weiter zu entwickeln; Ein marktkonformes Festgehalt mit leistungsbezogenem Bonus; Attraktive zusätzliche Leistungen: Urlaubsgeld, Rentenbeitrag, 25 Urlaubstage/Jahr, vergünstigte Krankenversicherung

Swedish speaking internal auditor

Language: Swedish
Location: Amsterdam

Job Description
A Swedish speaking experienced internal auditor is sought for an exciting new role in Amsterdam. The successful candidate must be willing to

relocate or already live in the Netherlands. This position is ideal for an experienced internal auditor looking for a fresh and challenging position with a competitive salary, in beautiful Amsterdam. The role also offers frequent travel across Europe, so it is perfect for an experienced and flexible candidate looking for a varied role where no two days are the same.

You will be mainly based in the Amsterdam offices of our client, and your main responsibilities will be performing operational, financial, integrated and information systems audits in various areas across Europe.

As part of your duties, you will work on improving internal business processes, as well as preparing and reviewing planning procedures and auditing programs. You will also carry out independent audits working on your initiative.

Our client is an international retail company offering high quality products for both DIY enthusiasts and professionals across a range of areas. Their products include car accessories, spare parts, and tools, but they also offer a range of office, home and leisure supplies.

Job Specification

Applicants must be fluent in Swedish and English, both written and spoken, and live in the Netherlands, or be willing to relocate. Additional European languages would be beneficial but are not essential. Strong internal audit experience is essential, with a CIA, CISA, CPA, Ro, or equivalent relevant professional qualification.

A minimum of Bachelor or Masters level education in a relevant subject is also desired. Candidates must have significant proven experience working within a similar environment, preferably including public accounting or internal auditing.

Candidates must be able to demonstrate a solid knowledge of audit process and show a solid understanding of professional rules and regulations surrounding procedures.

Exceptional interpersonal and communication skills are essential, as well as the ability to work to tight deadlines, under your own initiative. The successful candidate will also demonstrate excellent analytical skills and a keen eye for detail.

The successful applicant must be willing to travel frequently, mostly in Europe, and must have an EU passport or Dutch work permit.

Specialised welders duplex steel

JOB SCOPE/PURPOSE:A Certified Welder uses expert welding techniques in construction, piping and sheet metal applications, which produce welds and welding joints to certified standards.

POSITION WITHIN ORGANISATION:Indirectly managed by the companies Operations Manager or his/her deputy. Supported by the Head of Personnel the company or his/her deputy. Placed by the company with a suitable manufacturing company (the Client), for the completion of specific tasks. Managed by and reporting to the

appropriate Line Manager within the Clients organization. Communicating and cooperating with colleagues at the Clients organization, on the correct working methods and processes for a particular task. JOB ACTIVITIES: analysing engineering drawings and weld instructions, to determine the appropriate welding methods, weld process and fabrication sequence. Organizing own workplace and correctly placing the required weld fume extraction equipment. Inspecting welding tools and filler materials, as well as checking whether pre-heated materials have the correct temperature and/or pre-produced components have been fabricated according to the drawings.

Completing welding work in accordance with the welding instructions and fabrication sequence agreed. Inspecting own work with the measuring tools available, to ensure it meets the specifications for dimensions and weld deposition, while keeping surface imperfections (i.e. weld burns, heat tint, heat discoloration) and slag (or flux residue) to a minimum. Taking great care to obtain the best quality finish after completion of welding work, by removing any slag or particulate matter. Ensuring the weld is defect-free and that it meets the acceptable levels of residual stresses and distortion. Offering the work for inspection to a

Line Manager or Quality Auditor. Completing other workshop activities as required. Welders will need to pass CERTIFICATION 6G/6GR in Duplex Those that show the potential for certification will receive a short training by the Company before presenting themselves for certification. KNOWLEDGE Analysing and understanding of engineering drawings, welding instructions, weld symbols and weld specifications. Experience in handling welding tools and

equipment, filler materials, shielding gasses and welding power supplies, as well as in operating lifting and transportation equipment. Expertise in welding a variety of metal types (i.e. carbon steel, aluminium, stainless steel), in applying the appropriate welding methods, and in selecting the suitable weld process and fabrication sequence. Understanding of the health & safety and environmental regulations of Deltametaal and the Client. Command of the English /Dutch or German language)(verbal and written) is an absolute must. EXPERIENCE PROFILE: Sufficient work experience to be able to independently conduct all job activities relating to the role of Certified Welder and the ability to apply both arch welding (MIG/MAG or GMAW=Gas Metal Arc Welding) as well as stick welding (SMAW=Shielded Metal Arc Welding) techniques. SKILLS & COMPETENCIES: The analytical skills required for the correct interpretation of engineering drawings, welding instructions and product specifications. The mechanical aptitude and manual skills needed to fully control the weld and the weldpool at all times (i.e. out-of-position welds), while applying either arc welding (MIG/MAG) or stick welding techniques. The communication skills needed to conduct technical discussions with both direct colleagues as well as line managers. Having a positive attitude towards management and colleagues, in addition to displaying commitment to the job and the company. A strong work ethic, demonstrated by a professional, flexible and problem-solving approach, while delivering top quality workmanship. ACCOUNTABILITIES: Following weld specifications and agreed fabrication sequence, as well as producing weld joints to strict quality and quantity specifications. Working to close tolerances.

Front End Web Developer

NIPO Software is a leading supplier of software solutions for data collection by conducting interviews to the professional market research industry. We are part of the Kantar group, the world's leading market information group with over 35,000 full-time employees. We deliver state-of-art, user friendly, highly integrated, open, and technically complex solutions. NIPO Software develops fully according to Agile principles where multiple development teams take full responsibility for delivering technology that makes a difference. We are Microsoft Gold partner for Application Development and have a very strong in-house development team that is continuously stimulated to grow their skills, adopt the latest technologies, retrieve continuous training and to be actively involved in leading industry happenings like the Microsoft Build event. NIPO Software has a very strong and international oriented team with a total of 45 colleagues at offices in Amsterdam, Hong Kong, and Buenos Aires.

NIPO Software is building a completely new platform that is fully scalable, resilient, and equipped for hybrid data collection. This system is exclusively deployed on the Microsoft Windows Azure Cloud platform. To further speed up the delivery of our new platform, we aim to extend our development capacity with two:

Your role

- develop the front end part of our application in a Microsoft environment using HTML, Javascript/jQuery and CSS;
 - co-design the front end of our application in close co-operation with our UX-designer;
 - participate actively in discussions on design, architecture, implementation, and in Scrum team meetings, etc.;
- Your specifications
- extensive experience with web development languages HTML, CSS and JavaScript/jQuery;
 - highly creative
 - very strong drive to make our product the most attractive and most intuitive within the industry;
 - excellent team player, open minded, explorative, capable of working under pressure, and crystal clear in reporting

- ability to speak and write English is mandatory, Dutch is not a must
- eager to grow your professional skills
- passionate about Agile development principles;
- eligible to live and work in the Netherlands (EU resident).

Our offer

- good salary and benefits;
- highly challenging and ambitious working environment with informal communication and relationships
- permanent support to grow your professional skills
- office in city centre of Amsterdam, close to Central Station
- flexible working hours
- highly experienced colleagues to team up with.

At the start you will be offered a contract for 6 months, followed by a contract for a year and after that we will offer a permanent contract. Salary to be negotiated and depending of experience
Flexible working hours starting between 7.30 en 10.30 in the morning, finishing between 15.30h and 19.00h . You have an average working week of 7.75hrs a day

More Information

NIPO Software is an ambitious, informal, multi-cultural and flat organization in which you will be able to develop yourself. Interested?
Are you interested in applying for the position of Front End Web Developer and eligible to live and work in The Netherlands? Full English job description is available on request. mail to erdal.egin@uwv.nl

Valve engineer

At BSM Valves we strive to provide our customers with high-quality, specialty valves as quickly and as efficiently as possible. In our facility in Breda we manufacture ball valves, gate valves, through conduit, globe and needle valves, check valves as well as strainers. Our valves are made to order, in large or small quantities, depending on the customer's wishes. Demanding applications, small quantities and stringent international standards are all things we are very familiar with here at BSM Valves. Our stock is anything but standard. We cater to a wide variety of customers in a specialist industry and will do our utmost to fulfil even the most demanding of specifications.

Currently we are looking for an experienced Valve Engineer

In this position you will be working at the Engineering Department and report to the Manager Engineering.

You are responsible for the translation of customer demands (as prescribed in specifications, order description, generic codes and other similar information) into an optimal customer specific design (specification) including code compliance of a wide range of valves. You work closely with the colleagues from other departments.

Tasks and responsibilities:

- Design of valves according to customer demands and applicable international standards;
- Interaction with customer to optimize design;
- Specifying design by engineering documents like (part) drawings, bill of materials, manuals, Technical Construction Files (etc.);
- Development of Inspection test plans and Valve data sheets (ITP/VDS);
- Making Strength (both by FEA as well as manually) and Flow calculations;
- Technical Trouble shooting together with colleagues from Sales, Purchase and Operation departments;
- Document control of engineering's documents according to company procedures.

Qualifications:

- Bachelor of Science degree (preferably in Mechanical engineering);
- At least 5 years experience in similar position in oil/gas and/or offshore industry;
- Experience with engineering tools like 3D CAD, PDM, FEM and Flow analysis;
- Capable to translate customer specifications and applicable international standards into engineering solutions like (component)drawings, parts lists, construction files and other reports;
- Experience with manual strength calculations;
- Knowledge of industry standards like API-6, PED directive, ATEX etc.;
- Knowledge of most used sealing systems / materials;
- Knowledge of design verification methods like FMEA's, risk analysis etc.;
- Experience in Microsoft Office (Word, Excel, Outlook).

We are looking for ambitious, stress resistant candidates with a no-nonsense attitude. FOR MORE INFORMATION PLEASE VISIT OUR WEBSITE www.bsmvalves.com. WE OFFER AN INFORMAL ATMOSPHERE, EXCELLENT PAYMENT AND WORKING UNDER THE DUTCH COLLECTIVE LABOUR AGREEMENT FOR THE METALWORKING INDUSTRY

Customer Service Representative

As an Inbound Sales & Service Representative, you are responsible for handling incoming traffic for an international travel company. As a Sales & Customer Service Representative, you will be working in different shifts and will be responsible for handling pre- and post-reservations inquiries. You are able to detect sales leads and make the final booking. Next to that you stimulate up-selling, cross-selling and customer loyalty. Most of the time you are the first point of contact for customers calling with our contact centre. You provide service to our customers and try to exceed their expectations during each call.

Do you have what it takes?

For this job, we need multilingual people who are looking for a job for a minimum of 6 months.

- You have a very good command of the Norwegian, German or Swedish (near native, written and spoken) and the English language, Dutch not required.
 - You can relate to customers and you can use key sales techniques to realize sales results;
 - You have excellent commercial and communicative skills;
 - Providing a high level of customer service;
 - Computer skills: Microsoft Office Suite and typing 25 words a minute;
- Preferably you have experience in working at a call centre and/or in a travel related industry. Especially experience at a customer service/ sales department or back office environment of a travel agency, tour operator or airline would be a great advantage.

We offer a 6 month contract, after that we offer a contract of 1 year. You will get a bonus (€ 500,- gross) if your contract is prolonged after six months. Still working with Xerox after 12 months? Then you'll receive an additional bonus of € 500,-. We offer an informal and friendly work environment in Almere (a city very close to Amsterdam) and in addition we offer the following: flexibility in work schedule is required during the opening hours of the Sales and Service desk.

- Travel expenses will be reimbursed;
- 6 month contract with possibility to extend;
- Attractive incentives.

Welders 6G en 6GR certified

Certified Welder 6G and 6GR, in a combined welding position during the production of offshore installation / offshore installation elements such as Jackets and Topsides. With the following specifications:

Welding process: 136 FCAW / 111 SMAW
Positions: all
Shielding gas: Argon \ CO2 80 \ 20

About our client:
Our client is specialized in the design and manufacture of steel structures for projects in the field of Offshore (oil, gas and wind), tank construction, infrastructure and industrial maintenance.
We are looking for welders to strengthen the fabrication departments of our clients offshore installations construction department, with high quality craftsmanship. All our clients assignments are custom made and often customized with relative high complexity. Our client is a fully certified company, consequently all the procedures and methodologies used are continuously assessed and monitored.

As a certified welder you will have a dynamic and varied position. The welder 6G and 6GR, is combined in one position. The 6G welder is ranked on European standards as S HL045. The welder 6GR is ranked following the American qualifications as AWS D11.

The welding has to be accomplished by the following strict requirements. For quality guarantee reasons all welding will be judged and will be NDT certified.

You will be responsible for building constructions varying from small to large structures. Large structures like complete structures and structural components for the offshore. It is a solid requirement that you have experience with the welding of offshore structures / structural parts including "jackets and topsides". You are capable of understanding technical drawings, and it is necessary that you are capable of independently compile constructions (drilling, cutting, sawing) and finish the welding.

- Job requirements:
- At least completed a technical professional education (or equivalent level of education)
 - Experience with contracts for offshore: a minimum of 3 years experience being hired as a certified 6G /6GR welder in the fabrication of offshore / offshore elements such as Jackets & Topsides
 - Valid certificates and stamp lists or proven experience
 - Being able to make highly accurate welding joints between components like (carbon steel, stainless steel, duplex, cunifer etc.)

- Willingness to assess your skills by welding tests
- Being able to work with materials in various thicknesses
- A valid safety certificate (VCA)
- A positive and solution-oriented attitude
- Any additional training is a plus!

Additional technical requirements:

- Suitable candidates should be skilled in independently judging with welding method fits the object's opening. For both 6G and 6GR.
- Also, the polarity must be known at the welding of 6125 1 mm, and the filling and closing 6138 1.2 mm.
- Candidates should be aware that there may be not be any welding penetration from the bottom side. In addition, they must be grinding the welding in order to prevent any flowing build-ups.
- The candidates must be working from bottom to top welding, not only between the lumps. If this if this still would happen, then it will causes problems during the inspections.
- The last layer of the sealing layer must be in the middle. It's not allowed to grind the welding or the sealing layer.

Furthermore it's important to weld with the proper voltages and amperages. Both the by welding, filling and sealing. These amperages and voltages should at least not be too low amperage voltage pole wire.

What do we offer?

- A professional, dynamic and challenging work environment
 - Personal development
 - Continued growth opportunities
 - An excellent package of salary and benefits
- Offered is a temporary contract till 31-12-2014, extension is possible.

Location: PAPENDRECHT.
